This text seeks to provide the necessary background for understanding the contemporary relationship between Islam and modern science. Presenting an authentic discourse on the Islamic understanding of the physical cosmos, Muzaffar Iqbal explores God's relationship to the created world and the historical and cultural forces that have shaped and defined Muslim attitudes towards science. What was Islamic in the Islamic scientific tradition? How was it rooted in the Qur'anic worldview and whatever happened to it? These are some of the facets of this account of a tradition that spans eight centuries and covers a vast geographical region. Written from within, this ground-breaking exploration of some of the most fundamental questions in the Islam and science discourse, explores the process of appropriation and transformation of the Islamic scientific tradition in Europe during the three centuries leading up to the Scientific revolution.

Questioning Islam-Peter Townsend 2014-06-27 Many questions are currently being asked about the place of Islam in the modern world. Among these questions the most important one of all sometimes gets lost: Is Islam true? With his new book author Peter Townsend invites you to accompany him on a journey through the foundational texts of the Muslim religion. In the process the truth-claims of Islam will be respectfully, honestly and impartially evaluated. Along the way the following questions will be asked:• Can the traditional Islamic historical accounts be trusted?• Is the Qur'an a 'Perfect Book, Perfectly Preserved'?• Was Muhammad indeed a 'Beautiful Pattern of Conduct'?The answers to these questions will not be sought from modern commentaries on Islam. Instead Questioning Islam goes straight to the classic sources of Islam namely the Qur'an, hadiths (traditions) and biographies of Muhammad. Questioning Islam is not an attempt to promote any other belief system or ideology. Its focus is simply on asking the hard questions about Islam that are all too often ignored or swept under the carpet. Simply put, if you have ever wondered whether the truth-claims of Islam can withstand critical scrutiny then this book is for you!

Islamic Thought in China-Lipman Jonathan Lipman 2016-06-02 How can people belong simultaneously to two cultures, originating in two different places and expressed in two different languages, without alienating themselves from either? Muslims have lived in the Chinese culture area for 1400 years, and the intellectuals among them have long wrestled with this problem. Unlike Persian, Turkish, Urdu, or Malay, the Chinese language never adopted vocabulary from Arabic to enable a precise understanding of Islam's religious and philosophical foundations. Islam thus had to be translated into Chinese, which lacks words and arguments to justify monotheism, exclusivity, and other features of this Middle Eastern religion. Even in the 21st century, Muslims who are culturally Chinese must still justify their devotion to a single God, avoidance of pork, and their communities' distinctiveness, among other things, to sceptical non-Muslim neighbours and an increasingly intrusive state. a a The essays in this collection narrate the continuing translations and adaptations of Islam and Muslims in Chinese culture and society through the writings of Sino-Muslim intellectuals. Progressing chronologically and interlocking thematically, they help the reader develop a coherent understanding of the intellectual issues at stake.

Arab Cultural Awareness-U. S. Army Training and Doctrine Command 2006-12-04 This handbook is designed to specifically provide the trainer a 'hip pocket training' resource. It is intended for informal squad or small group instruction. The goal is to provide soldiers with a basic overview of Arab culture. It must be emphasized that there is no "one" Arab culture or society. The Arab world is full of rich and diverse communities, groups and cultures. Differences exist not only among countries, but within countries as well. Caveat: It is impossible to talk about groups of people without generalizing. It then follows that it is hard to talk about the culture of a group without generalizing. This handbook attempts to be as accurate and specific as possible, but inevitably contains such generalizations. Treat these generalizations with caution and wariness. They do provide insight into a culture, but the accuracy and usefulness will depend on the context and specific circumstances.

Striving in the Path of God-Asma Afsaruddin 2013-05-07 In popular and academic literature, jihad is predominantly assumed to refer exclusively to armed combat, and martyrdom in the Islamic context is understood to be invariably of the military kind. This perspective, derived mainly from legal texts, has led to discussions of jihad and martyrdom as concepts with fixed, universal meanings divorced from the socio-political circumstances in which they have been deployed through the centuries. Asma Afsaruddin studies in a more holistic manner the range of significations that can be ascribed to the term jihad from the earliest period to the present and historically contextualizes the competing discourses that developed over time. Many assumptions about the military jihad and martyrdom in Islam are thereby challenged and deconstructed. A comprehensive interrogation of varied sources reveals early and multiple competing definitions of a word that in combination with the phrase *fi sabil Allah* translates literally to "striving in the path of God." Contemporary radical Islamists have appropriated this language to exhort their cadres to armed political opposition, which they legitimize under the rubric of jihad. Afsaruddin shows that the multivalent connotations of jihad and *shahid* recovered from the formative period lead us to question the assertions of those who maintain that belligerent and militant interpretations preserve the earliest and only authentic understanding of these two key terms. Retrieval of these multiple perspectives has important implications for our world today in which the concepts of jihad and martyrdom are still being fiercely debated.

Contemporary Bioethics-Mohammed Ali Al-Bar 2015-05-27 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of *al-fitr*' a (nature) and human intellect (*al-'aql*). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice - the *maqasid* - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (*al-nasl*) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

The Fall and Rise of the Islamic State-Noah Feldman 2012-08-26 Perhaps no other Western writer has more deeply probed the bitter struggle in the Muslim world between the forces of religion and law and those of violence and lawlessness as Noah Feldman. His scholarship has defined the stakes in the Middle East today. Now, in this incisive book, Feldman tells the story behind the increasingly popular call for the establishment of the *shari'a*--the law of the traditional Islamic state--in the modern Muslim world. Western powers call it a threat to democracy. Islamist movements are winning elections on it. Terrorists use it to justify their crimes. What, then, is the *shari'a*? Given the severity of some of its provisions, why is it popular among Muslims? Can the Islamic state succeed--should it? Feldman reveals how the classical Islamic constitution governed through and was legitimated by law. He shows how executive power was balanced by the scholars who interpreted and administered the *shari'a*, and how this balance of power was finally destroyed by the tragically incomplete reforms of the modern era. The result has been the unchecked executive dominance that now distorts politics in so many Muslim states. Feldman argues that a modern Islamic state could provide political and legal justice to today's Muslims, but only if new institutions emerge that restore this constitutional balance of power. The Fall and Rise of the Islamic State gives us the sweeping history of the traditional Islamic constitution--its noble beginnings, its downfall, and the renewed promise it could hold for Muslims and Westerners alike. In a new introduction, Feldman discusses developments in Egypt, Tunisia, Libya, and other Muslim-majority countries since the Arab Spring and describes how Islamists must meet the challenge of balance if the new Islamic states are to succeed.

Shariah Law-Mohammad Hashim Kamali 2017-07-06 Shariah law is a subject that is misunderstood and misrepresented by many in the West. More than simply a system of law, it is concerned with a set of values and rules that are essential to the understanding and practice of Islam. In this volume, Mohammad Hashim Kamali, a world-renowned expert on Shariah, adopts a question-and-answer format to provide a clear introduction to its

most salient aspects. Extending from the sources of Shariah in the Qur'an, hadith and the legal maxims of Islamic law to the discussion of issues such as freedom of religion, gender equality and human rights, Shariah Law: Questions and Answers connects the theoretical aspects of the law with how it is applied in the world today. At once scholarly and accessible, it is sure to be a vital resource for students, teachers and general readers, addressing as it does a range of contemporary concerns, including jihad, democracy, the environment, genetic engineering, human cloning, euthanasia and abortion.

Modernity and the General Philosophy of-Sulaiman Lebbe Mohamed Rifai 2019-05-04 The general philosophy of Islamic law: This book primarily addresses three salient questions. What is the general philosophy of Islamic law: Maqāsid al-Shari'ah? Why do we need the doctrines of the general philosophy of Islamic law today? How do we apply the doctrines of the general philosophy of Islamic law in this modern world? The basic argument of this book is that dramatic social changes are taking place around us in this digital world. So, to relate Islamic teaching into this modern global world, we need not only a comprehensive reading of the divine text, but also, a comprehensive understanding of the contexts of this modern world. We could no longer adhere to the literal interpretation of divine texts in this modern world on certain aspects of Islamic teaching. Neither classical Islamic thought nor the literal legal schools provide ready-made answers for the problems of modern Islamic world. This does not mean we must abandon the divine text as some radical Muslim secularists claim. This does not mean we should ignore 1400 years of intellectual legacies in Islamic history. There is nothing wrong with the divine texts of the Qur'an and the prophetic traditions. Nevertheless, human understanding to the divine texts differ from century to century, place to place and person to person. For the last 14 centuries, different Muslim communities have been reading the corpus of Islamic law differently within their own social contexts. There is no uniformity in human understanding of divine texts. They are prone to different human interpretation for various reasons. The corpus of Islamic law we have today are the collections of the 1400 hundred years of the Islamic legal interpretation of different times and social contexts. Today, to choose some appropriate legal ideas from the 1400 hundred years of Islamic legacy we should have not only a thorough knowledge of Islamic sciences, but we should also contextual understanding of the divine texts. We should know how to relate the divine texts appropriately to the modern social conditions. The principles of the general philosophy of Islamic law are contrived to facilitate the application of the divine texts into different contexts without diluting the primary values of the divine texts. It is argued by many Muslim scholars that the Muslim communities are suffering from intellectual and ideological crises presently. This is reflected in the socio-political and religious thought of the contemporary Muslim communities Today; Islamic universities and colleges are producing thousands Muslim graduates in many Muslim countries. Most of these graduates are trained and educated in Islamic sciences alone without enough professional training and learning in modern sciences. As a result of this, many of them find it difficult to relate what they learn to the modern social issues. It is my firm contention in this book that the Muslim jurists must learn many modern sciences such as politics, geopolitics, economics, psychology, sociology, history, science, and many other areas of human sciences so that they could address the modern social issues that the Muslim community faces today. Otherwise, they would not be able to relate what they learn in Arabic college into modern social conditions. Therefore, I would argue that learning modern sciences is a prerequisite for the students of Islam to become jurists or scholar in Islam. It is also my conviction that many radical Muslim groups do not know how to relate many aspects of Islamic teachings into modern geopolitical and social conditions. They come into some erroneous conclusions in many religious issues. Because, they take the literal meanings of the divine texts and prophetic traditions without due consideration into the modern social conditions of this global world.

History of Islamic Philosophy-I.M.N. Al-Jubouri 2004 Very occasionally a book appears which provides a perfect bridge between amateurs and professionals. This event is usually less likely to happen in the somewhat arcane field of philosophy and almost beyond concept in the English speaking world when the subject is entwined with the history of Islam. The finer points of philosophical issues are also discussed and presented to enable anyone, whether a scholar or not, Arabic or Westerner, to understand the truths these ancients sought.
